Specializing in the Most Important Facilities For Our Common Good: Healthcare

Broaddus Construction knows what it takes to deliver some of the most intricate and vital healthcare facilities. Over the past four decades we have completed 41 Ambulatory Surgery Centers which includes new construction, renovations, and remodeling for licensure. This represents approximately 10% of the Medicare Certified ASC's across Texas. In the acute care sector, we have successfully completed over 450 projects including vertical hospital expansions/additions, free standing specialty hospitals, open heart surgery, bone marrow transplant units, NICU level IV, Level III Trauma facilities, oncology, and diagnostic services hyperbaric medicine and wound care.

Since 1972, Broaddus Construction has built relationships with our clients, designers, and subcontractors based on teamwork and trust. This attitude and approach fosters an environment of mutual respect and cooperation among all members of the project team, and results in satisfied clients that experience their vision become a reality.
